Amendment to the Abstract:

The Abstract has been amended. A revised Abstract is attached.

ABSTRACT

A multilayer ceramic substrate has a first conductive pattern (3) that is transfer-printed on a ceramic substrate (2) using an intaglio plate made of a flexible resin, and The intaglio plate has a plurality of grooves with different depts. a A first insulation layer (21) is on the first conductive pattern formed thereon, and a second conductive pattern (4) is formed on it the insulating layer. The two conductive patterns (3, 4) are coupled by means of a via (11).
